

Water Sources on the Arizona Trail by Passages

Arizona Trail Current Water Reports

5-Jun-08

Winter storms in Dec., Jan., and Feb. brought rain/snow to Arizona; for example, over 6" of rain in the White Canyon Passage. Water is still running in many mountain washes/creeks.

Mileage -- south to north -- agrees with Arizona Trail Segment Passages and GPS data at www.aztrail.org. (Mileage may be slightly different from The Official Guide book.)

Information in this report is provided as a service to the community. Information in this report may not be accurate. Natural water sources in Arizona can and do rapidly change. Water cache may be empty. The user of this information is solely responsible for their own safety. Hike your own hike.

Man made water sources are listed as TOWN or other facility. Some locations may be closed and no water available. The LOCATION will indicate if a water source is off trail with a note, such as 0.5m E

Abbreviations: **m** - mile; **N** - north; **E** -east; **S** - south; **W** - west. "~" means "about"

It is recommended that water sources be verified with local sources, such as Forest Service Ranger Stations, National Park Service, Bureau of Land Management offices, or AZA Trail Stewards. Water quality may vary greatly and it is recommend that water sources be treated to reduce risk of water borne diseases.

Passage Miles	S-N Miles	Location	Type	Historic Water Reliability	Report "-" means no report	Date	Reported by	Date Posted
21.7 Passage 1 Huachuca Mountains: Mexican Border - Parker Canyon Lake
